WORK EXPERIENCE

- NexVision Innovations Inc.** | Lead Full-Stack Developer **Jan 2026 – Aug 2026**
 - Promoted to Lead Full-Stack Developer to direct enterprise web and mobile development, designing scalable backend services, REST APIs, and database architectures with Node.js, PostgreSQL, and Supabase.
 - Collaborated across teams to troubleshoot issues, execute system testing, and support reliable production deployments, aligning technical solutions with stakeholder goals and user requirements.
- Freelance VA** | Full Stack Web Developer VA **April 2023 – September 2026**
 - Delivered end-to-end web development and high-converting landing pages for Australian and global clients, including fire safety companies, utilizing modern full-stack frameworks and WordPress solutions.
 - Managed complete technical setups including GoDaddy and Cloudflare DNS configuration, third-party REST API integrations, AI chatbot support, on-page Google SEO, and Google Analytics tracking.
- Freelance** | *Web Developer 3+ Years* **Nov 2023 – January 2026**
 - Delivered end-to-end web development projects, including information systems, business websites, and custom frontend solutions for students, businesses, and private clients across local and international markets.
 - Built 2+ capstone systems and developed a fully customized wedding invitation website for international clients, handling requirements gathering, UI/UX, development, deployment, and client revisions.
- Department of Education – Central Division** | *SPES Clerk* | *Database Management* **May 2024 – Aug 2024**
 - Processed and encoded 1,000+ official records into the central database with 99% accuracy, supporting document management for 10+ administrative personnel.

PROJECTS

- Learning Management System with AI-Generated Reviewer** | *PHP, HTML, CSS, Bootstrap, JavaScript, MySQL*
 - Developed and deployed a Learning Management System serving 1,000+ students and teachers with AI-powered reviewer generation, chatbot assistance, automated quizzes and flashcards, predictive analytics, role-based access control, and cloud deployment.
- Beauty Connect – Service Booking & Vendor Management Platform** | *React, TypeScript, Supabase, TailwindCSS*
 - Led the development of a multi-tenant platform that enables customers to discover and book beauty services while helping salons manage appointments, POS transactions, CRM, staff, and business operations through real-time synchronization and automated SMS/email notifications.
- BazaarX – Enterprise Multi-Tenant E-Commerce Platform** | *React, React Native, TypeScript, Supabase, LLM, VPS*
 - Led the architecture and development of a trusted multi-vendor marketplace for authentic products featuring web and mobile applications, an AI visual product scanner, LLM shopping assistant, integrated multi-branch POS, inventory management, and enterprise-grade vendor operations.
- HRMS & Payroll Management System** | *Next.js, TypeScript, PostgreSQL, Face/ Fingerprint Recognition, NFC*
 - Developed an enterprise Human Resource Management System that streamlines employee attendance, face recognition and NFC authentication, payroll processing, leave management, workforce monitoring, and administrative reporting.
